Education

Army Institute of Technology, Pune — Pune, India
Bachelor of Engineering in Information Technology, CGPA: 9.1 — *Aug 2023 - Jul 2027*

Great Mission Public School, Ramnagar — Uttarakhand, India
PCM, Percentage: 90 — *Apr 2021 - Apr 2022*

Experience / Responsibilities

Full Stack Developer Intern — Mar 2025 - Jul 2025
Sniffi – Pet Home Care at Doorstep

- Designed responsive UI in Figma for mobile and desktop using modern design principles
- Developed frontend in React.js and Tailwind CSS; backend with Node.js, Express.js, and MongoDB
- Integrated AWS S3 for storage, implemented SEO, and deployed live at sniffi.in via GoDaddy

Technical Board, Army Institute of Technology — July 2024 - Present
Joint Secretary

- Designed social media posters for club promotions
- Created UI/UX designs for the Technical Board's website
- Contributed to event planning and management for technical fests like TechFest – SOLUTION

Projects

GitRater | *React.js, Node.js, TypeScript, Google Gemini API* — Jan 2026

- Developed an **AI-powered developer evaluation platform** that analyzes GitHub profiles to **assess code quality** rather than just commit volume
- Integrated **Google Gemini API** to process code snippets, generating an **"AI Multiplier" score** based on **logic efficiency** and best practices
- Engineered a **custom scoring algorithm** using the **GitHub API** (authenticated via **Personal Access Tokens**) to fetch and analyze **Pull Request acceptance rates** and issue resolution
- Built a **type-safe, scalable frontend** with **TypeScript** and **Vite**, ensuring **high-performance rendering** of dynamic user statistics and tier classifications

NATOURS - Dynamic Tour Booking Platform | *Node.js, Express, MongoDB, Pug, Stripe API, JWT* — Aug 2025

- Architected a **full-stack booking system** using the **MVC pattern**, implementing **Mongoose aggregation pipelines** for real-time tour statistics, reviews, and average rating calculations.
- Engineered a **secure authentication framework** utilizing **JWT** and **bcrypt**, featuring **Role-Based Access Control (RBAC)** and automated password reset workflows via Nodemailer.
- Developed a **production-ready RESTful API** integrated with **Leaflet.js** for interactive geospatial maps, protected by security middleware like **rate limiting** and **data sanitization**.
- Integrated **Stripe API** for secure end-to-end payment processing and utilized **Multer/Sharp** for automated server-side **image processing** and resizing for user profiles.

Scholarship Management System | *MySQL* — Mar 2025

- Designed and implemented the **database schema** using **SQL** to store and manage student scholarship records
- Executed **queries and operations** via **command line** for adding, updating, and retrieving student application details
- Used **aggregate functions** and **joins** to generate summaries of approved and pending scholarship applications

Technical Skills

Languages: C++, Java, JavaScript, HTML/CSS
Frameworks: React, Node.js, Express.js, Tailwind CSS
Databases: MySQL, MongoDB
Developer Tools: Github, VS Code, Eclipse, Postman, Figma, Canva

Awards and Achievements

2nd Runner Up, Innerve X Hackathon (Jan 2026):Secured podium finish among 50+ teams by engineering 'gitRater', an AI-powered developer evaluation platform
Pupil (Codeforces) & 5-Star (HackerRank): Solved 300+ algorithmic problems across LeetCode, Codeforces, and HackerRank, demonstrating strong grasp of Data Structures
Among Top 3, PBL Project (Apr 2024):Applied Project-Based Learning methodologies to solve real-world problems at Army Institute of Technology, Pune
Top 2 Finish, (Mar 2024): Recognized for Video Editing , selected among 100 participants
Top 2 Finish, Graphica Hackathon (Nov 2023):Competed against 120+ participants in a 6-hour hackathon organized by the AIT Open Source Software Club, demonstrating teamwork and problem-solving skills
