Education

Army Institute of Technology — Pune, India
Bachelor of Engineering in Information Technology, CGPA: 9.07 — *Aug 2023 - Jul 2027*

Projects

Synapse Grid - Multi-Agent AI Research Platform | *Python, LangChain, Groq API, Streamlit* — Jun 2026

- Architected a **multi-agent AI system** using **LangChain** and **Groq API** to autonomously execute web research and generate structured Markdown reports
- Engineered a **Search Agent** via **Tavily API** for live data fetching, and a **Reader Agent** using **BeautifulSoup** for deep content scraping
- Designed an **LCEL pipeline** featuring a **Writer Chain** for data synthesis and a **Critic Chain** for automated report scoring and AI feedback
- Developed an interactive **Streamlit** frontend to dynamically capture user research topics and display AI-generated insights in real-time

GitRater | *React.js, Node.js, TypeScript, Google Gemini API, PostgreSQL* — Jan 2026

- Developed an **AI-powered developer evaluation platform** that analyzes GitHub profiles to **assess code quality** rather than just commit volume
- Integrated **Google Gemini API** to process code snippets, generating an **"AI Multiplier" score** based on **logic efficiency** and best practices
- Engineered a **custom scoring algorithm** using the **GitHub API** (authenticated via **Personal Access Tokens**) to fetch and analyze **Pull Request acceptance rates** and issue resolution
- Built a **type-safe, scalable frontend** with **TypeScript** and **Vite**, ensuring **high-performance rendering** of dynamic user statistics and tier classifications

MeritMatch - Scholarship Management System | *React, Node.js, Express, MySQL, Tailwind* — May 2026

- Built a relational database using **raw SQL**, writing queries with **JOINs** and **Window Functions** to power a real-time admin dashboard for ranking candidates
- Developed RESTful APIs using **Node.js** and **Express**, utilizing **SQL Transactions** to securely save data across multiple tables and enforce application limits
- Created a secure authentication system using **JWT** and **bcrypt**, setting up **Role-Based Access Control (RBAC)** for Admins, Reviewers, and Students
- Designed a responsive frontend using **React** and **Tailwind CSS**, managing user sessions globally and protecting private routes from unauthorized access

Technical Skills

Languages: C++, Core Java, Python, JavaScript, TypeScript, HTML/CSS
Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, LangChain
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git/GitHub, VS Code, Postman, Figma

Leadership & Extracurriculars

Technical Board, Army Institute of Technology — July 2024 - May 2026
Joint Secretary

- Designed **social media posters** and **UI/UX interfaces** for club promotions and the official website
- Contributed to **event planning and management** for major technical fests like **TechFest – SOLUTION**

AIT Research And Development Club — Aug 2023 - May 2024
FE Member

- **Mentored 50+ students** in core **web development** concepts (**HTML, CSS, TailwindCSS, JavaScript**)
- **Organized and managed** various technical events and hackathons including **Fusion**

Awards and Achievements

2nd Runner Up, Innerve X Hackathon (Jan 2026): Secured podium finish among 50+ teams by engineering 'GitRater', an AI-powered developer evaluation platform
Consistent Problem Solver (LeetCode & HackerRank): Solved 300+ algorithmic problems, demonstrating a strong grasp of Data Structures and analytical thinking
Top 3 Finish, PBL Project (Apr 2024): Applied Project-Based Learning methodologies to solve real-world problems at AIT, Pune
Top 2 Finish, Graphica Hackathon (Nov 2023): Competed against 120+ participants in a 6-hour sprint, demonstrating rapid prototyping and teamwork
